

**Doctoral Series: Vol. 2**  
**Taxing Portfolio Income in Global Financial Markets**

**Contents**

**Chapter I: The globalized world of finance – a snapshot**

1. The structure of the financial system
  - 1.1 The markets for credit in context
  - 1.2 Financial markets: functions, institutions and participants
  - 1.3 Recent trends in financial markets
  - 1.4 The new shape of financial markets: the "democratization of finance"
  
2. International financial markets
  - 2.1 The foreign exchange market
  - 2.2 "Offshore" markets
  - 2.3 Offshore financial centres
  - 2.4 The "internationalization" of domestic debt and equity markets
  - 2.5 Derivatives markets
  - 2.6 International banking and "global trading"
  
3. The globalization of financial markets: theory and practice
  - 3.1 Financial markets' integration: a report card
  - 3.2 Financial markets' integration: the facts
  - 3.3 The different flows of capital
  
4. Regulatory environment
  - 4.1 The government's role in financial markets
  - 4.2 The purpose of regulation: ensuring financial markets proper functioning
  - 4.3 The national regulatory environment
  
5. A (prudent) look into the future

**Chapter II: Taxing cross-border capital income – the theoretical foundations**

1. The requirements of a "good" tax system
2. The domestic story: taxing capital in a closed economy
  - 2.1 Efficiency considerations and the theory of "optimal taxation"
  - 2.2 The various forms of capital and their implications
  - 2.3 Financial markets and financial intermediation in the closed economy model
  
3. Taxing capital in an open economy
  - 3.1 The efficiency debate
  - 3.2 The equity debate
  - 3.3 Administrative considerations
  
4. Taxing capital in a multinational environment: tax competition, tax coordination and tax harmonization

- 4.1 Tax competition: a virtue or a problem?
- 4.2 Benefactor and menace at once: reconciling the contrasting approaches to tax competition
- 4.3 Tax coordination: an exercise in minimalism
5. The theoretical foundations: preliminary conclusions

### **Chapter III: Taxing portfolio income – the unglobalized international tax arsenal**

1. The tools of the trade: unilateral means
  - 1.1 Source-based taxation of foreigners' portfolio investment
  - 1.2 Source-based taxation of banks' financial business income
  - 1.3 Residence-based taxation of foreign passive income
  - 1.4 Unilateral enforcement means
2. The tools of the trade: bilateral means
  - 2.1 Bilateral coordination of the tax base
  - 2.2 Bilateral aid in enforcement
  - 2.3 Unilateral versus bilateral solutions: an evaluation
3. The tools of the trade: multilateral efforts
  - 3.1 Dividing the tax base
  - 3.2 Multilateral cooperation and assistance in enforcement
  - 3.3 The OECD harmful tax competition initiative
4. Tax evasion, tax avoidance and tax competition - some empirical evidence
  - 4.1. Tax competition: the empirical evidence
  - 4.2. Tax evasion and capital flight

### **Chapter IV: The politics of international cooperation in theory**

1. Politics of the new world: globalization and sovereignty
  - 1.1 The old world and the new one
  - 1.2 Globalization and sovereignty - the end of the nation-state?
  - 1.3 Redefining sovereignty and the role of the state
2. International cooperation: the theoretical background
  - 2.1 Sorting out the definitions: international cooperation, regimes and institutions
  - 2.2 Rationalist theories of international cooperation
  - 2.3. Constructive theories of international cooperation

### **Chapter V: The politics of international cooperation in practice**

1. Coordinating monetary and fiscal policies
  - 1.1 International macroeconomic policy coordination: recent experience
  - 1.2 The political economy of macroeconomic policy coordination
2. Governing international trade: GAI'11 and the WTO
  - 2.1 The (concise) history of the international trade regime
  - 2.2 The international trade regime: an analysis
3. Governing the international monetary system

- 3.1 The BIS
- 3.2 The IMF

- 4. Regulating international financial markets
  - 4.1 Banking regulation: the Basle Committee
  - 4.2 Securities regulation
  - 4.3 Insurance supervision
  - 4.4 Regulating financial conglomerates: trans-national, trans-agency joint efforts
- 5. The combat against money laundering
  - 5.1 Unilateral and bilateral efforts
  - 5.2 Multilateral efforts: the FATF

### **Chapter V1: The international tax system and global financial markets – some positive and normative conclusions**

- 1. Towards a positive theory of the international tax system
  - 1.1 The international tax issue: some unique (and not so unique) characteristics
  - 1.2 Explaining the observed system
  - 1.3 Forecasting the future
  - 1.4 The positive theory of international taxation: a summary
- 2. National tax systems in global financial markets: some normative conclusions
  - 2.1 Tax base harmonization as a multilateral policy goal
  - 2.2 Tax enforcement as a multilateral policy goal
- 3. Concluding remarks
