IBFD Africa Tax Symposium

In just a few years, the IBFD Africa Tax Symposium has become Africa's key tax event, drawing together tax professionals from industry, from practice, from governments, from civil society and from the judiciary. This makes it an outstanding platform for your business to grow its market understanding and brand presence in Africa.

The annual symposium is an initiative of the IBFD Centre for Studies in African Taxation (CSAT). CSAT is an autonomous think tank devoted to the study and development of African taxation. CSAT's main objectives are to:

- Study and provide well-researched opinions on African taxation
- Encourage research by Africans for Africa
- Find practical solutions that work within an African context

These objectives serve CSAT’s goal to improve Africa’s capacity to collect the tax revenue needed to fund development programmes, run essential services and achieve sustainable economic growth. This goal is in support of the United Nations Sustainable Development Goals and, in particular, “Goal 17: Revitalize the global partnership for sustainable development”. The IBFD Africa Tax Symposium is pivotal in our efforts to help achieve this goal at a national, regional and continental level.
The 8th IBFD Africa Tax Symposium will take place in Arusha, Tanzania from 24 to 26 May 2023 and will further build upon the incredible success and growth of the past eight years. Due to the 2020 pandemic, we postponed our live events and moved to online webinars. The online webinars drew over 250 tax specialists, practitioners and key organizations from all corners of the African continent and beyond.
