Part 1	
General Report <i>Frans Vanistendael</i>	29
1.1. Introduction	29
1.2. Policy issues	30
1.2.1. Absence of elimination of double taxation because of the coexistence of taxation of interest in the residence state and in the source state	30
1.2.2. Is the Savings Directive eliminating tax competition by giving priority to taxation of interest in the residence state, or is the Savings Directive a method to fight zero taxation in the source state, which must be considered as a form of “harmful tax competition”?	31
1.2.3. Other than purely budgetary reasons to tax interest income exclusively in the residence state	32
1.2.4. Should the Savings Directive not impose a mandatory tax credit for ordinary withholding taxes in the source state, or eliminate all taxation in the source state, thereby indicating which direction the European Court of Justice should take in eliminating double taxation?	32
1.2.5. How will the imposition of a special withholding tax in the source state coupled with a full refundable credit in the residence state affect the position of investors in the European Union in their relations with non-EU countries which still maintain ordinary withholding taxes to which ordinary tax credits correspond?	32
1.2.6. Is the obligation of cooperation in the enforcement of the tax system of another country a basic principle of international taxation?	33
1.2.7. Extension of the Savings Directive to other forms of income from capital or investment	33

1.2.8.	Are the guarantees for the international exchange of information in the United States satisfactory or should the European Union insist upon more comprehensive measures as defined in the OECD Model Convention and what would be different from the current US practice?	34
1.2.9.	Should there be a uniform way to submit evidence of residence and payment of interest within the European Union?	34
1.3.	The implementation of the Savings Directive	35
