

Tax and the Environment: a world of possibilities

Table of Contents

Part A – General Introduction

Policy frameworks and international organizations

1. Introduction
2. The context of environmental taxes and instruments
 - 2.1. Introduction
 - 2.2. Principles: theories behind environmental taxation
 - 2.3.1. Introduction
 - 2.3.2. Polluter Pays Principle
 - 2.3. Precautionary principle
 - 2.4. Least cost abatement
 - 2.5. Double dividend theory
 - 2.6. Microeconomic approaches
3. Other items to be covered when introducing environmental taxes
4. The production of a car: an example of how environment and environmental taxes are part of daily life
5. Policy instruments with respect to environment: a whole range of instruments
 - 5.1. Introduction
 - 5.2. Subsidies and tax reliefs
 - 5.2.1. Introduction
 - 5.2.2. Accelerated depreciation
 - 5.2.3. Investment allowances and tax credit
 - 5.3. Education and persuasion
 - 5.4 Regulation

International organizations

1. Introduction
2. Relevant treaties
3. WTO
 - 3.1. Introduction
 - 3.2. The role of the WTO
 - 3.3. Environment related disputes
4. OECD
5. UN
 - 5.1. Introduction
 - 5.2. Economic theory behind tradable emission permits
 - 5.3. Purpose and some definitions related to the UNFCCC and the Kyoto Protocol
 - 5.4. Parties to the Kyoto Protocol and their obligations
 - 5.5. Joint Implementation (Art. 6 Kyoto Protocol)
 - 5.5.1. Introduction
 - 5.5.2. Process JI

- 5.5.3. Key Parties of the JI Project
 - 5.5.4. Eligible projects
 - 5.6. CDM
 - 5.6.1. Introduction
 - 5.6.2. Process
 - 5.6.3. Key Parties for the CDM Project
 - 5.6.4. Eligible projects
 - 5.6.5. Problems with CDM
 - 5.6.6. Emissions trading (Art. 17)
 - 5.6.7. Tax issues
- 6. EU
 - 6.1. Introduction
 - 6.2. Greening of taxation
 - 6.2.1. Introduction
 - 6.2.2. Latest developments
 - 6.3. Emissions trading
 - 6.3.1. Introduction
 - 6.3.2. EU Emissions Trading Scheme Directive
 - 6.3.3. Issues
 - 6.4. Energy Tax Directive
 - 6.4.1. Introduction
 - 6.4.2. Recent developments
 - 6.5. EU renewable energy policy
 - 6.5.1. Introduction
 - 6.5.2. Renewables
 - 6.6. EU State Aid framework
 - 6.6.1. Introduction
 - 6.6.2. Compatible state aid
 - 6.6.3. Notification procedures
 - 6.6.4. Community Guidelines on State Aid for Environmental Protection
 - 6.6.5. Examples

Part B – Country Surveys

Including: Australia, Brazil, Canada, China, Germany, India, Japan, Netherlands, South Africa, Spain, Sweden, United Kingdom, USA

A – Direct taxation

1. Introduction
2. Exemptions for profits related to primary sector activities
3. Accelerated or free depreciation
4. Fiscal incentives (tax credits or exemptions) with respect to investments in energy-efficient and or environmentally-friendly assets
5. Fiscal incentives (credits or exemptions) for investors who invest in environmentally-friendly projects
6. Possibility to form provisions/reserves
7. Emission rights

8. Other environmental tax measures

B – Indirect taxation

1. Introduction
2. Primary sector activities
 - 2.1. Agriculture and forestry
 - 2.2. Livestock
 - 2.3. Fishing
 - 2.4. Mining
3. Energy
 - 3.1. Fossil fuels
 - 3.2. Electricity
 - 3.3. Renewables
 - 3.4. Nuclear energy
 - 3.5. Energy-intensive industry
4. Waste charges
 - 4.1. Landfill
 - 4.2. Incineration
 - 4.3. Recycling
 - 4.4. Dangerous waste
5. Water charges
 - 5.1. Water provision
 - 5.2. Waste water
6. Transportation
 - 6.1. Terrestrial transports
 - 6.2. Air transports
 - 6.3. Maritime transports

Part C - Summary

- Introduction
- Direct taxes
- Indirect taxes
- Conclusion
